Configuration

Configuration for pit

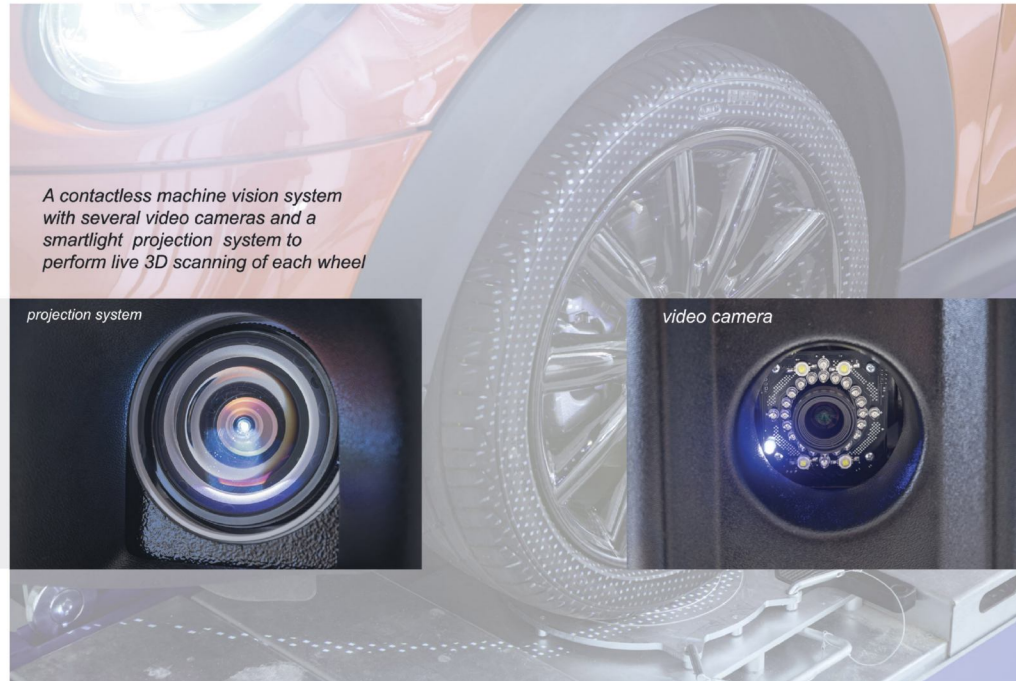

Configuration for lift

Complete car measurement accomplished within seconds

A contactless machine vision system

A contactless machine vision system with several video cameras and a smartlight projection system to perform live 3D scanning of each wheel

projection system

video camera

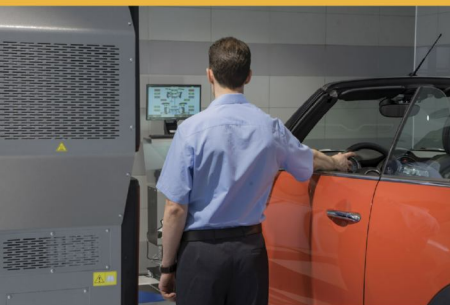

Full measurement and adjustment

4 posts equipped with 10 video cameras and 4 projection systems

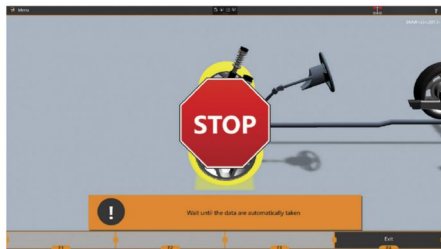

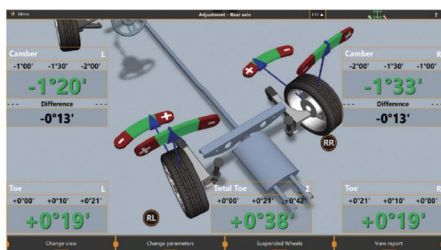

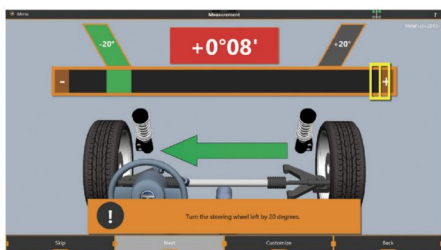

4 posts equipped with 18 video cameras and 8 projection systems

TechnoVector software is a powerful, flexible and the most up-to-date environment for wheel alignment

The **Techno Vector** software based on PC and works with **Windows 10**

Database

The database integrated in the software includes:

- wheel alignment specifications
- tire pressure specifications
- 3D animation
- adjustment diagrams and images
- **data for more than 40 000 vehicles**

Help System

The electronic Help system contains thorough information on working with the wheel alignment machine and software:

- video for working with the equipment
- video lectures on working with the program
- information on adjustments
- diagrams, images, video

Free annual software updates

Computer cabinets

Available colours: RAL 7040 RAL 5010 RAL 3002

V series T series Y series L series S series

Computer cabinet includes:

- PC with Intel Core i7 processor
- 22" and above widescreen LCD monitor
- keyboard, mouse
- printer
- wireless remote control
